(54) Title: ELECTRONIC DEVICES USING EARPHONES AND WIRELESS EARPHONES

(57) Abstract

In electronic device using earphones a conventional stereo transmitter using without antenna is connected and in a receiver capable of receiving without an antenna a small trimmer (1) for a variable condenser and a coupled resistances (2) for a variable resistor are connected to receive sound from electronic device by a wireless earphone.

Electronic Devices using Earphones and Wireless Earphones.

BACKGROUND OF THE INVENTION

FIELD OF THE INVENTION

The present invention relates to electronic devices using earphones such as audios, hand phones(Cellular phones), video phones, device for singing, game device, general telephones and internet phone and wireless earphones, more particularly, to electronic devices using earphones such as large audios for the rooms or portable small audios(cassettes) and wireless earphones.

DESCRIPTION OF THE PRIOR ART

Generally in earphones for electronic devices using earphones such as large audios or small audios i.e cassettes wires having earphone plugs for connection with jack of the devices should be connected in order to hear sound from electronic devices.

Therefore in case of large audios for the room since the electric wire

should be long in order to connect with the devices placed far away there is very incovenient to handle them and also in case for portable cassettes as small audios cassectes should be always connected by wire with earphones in order to hear sound from the cassettes.

SUMMARY OF THE INVENTION

The present invention is to improve conventional earphones having electric wires for electronic devices. Furthermore the present invention is to provide electronic devices using earphones capable of hearing sound of electronic devices by wireless earphones and wireless earphones for the devices, so that sound of the electronic devices can be heared from the electronic devices by only earphones without wires.

DESERPTION OF THE DRAWINGS

.Fig 1 represents an example of circuits of transmitters being used in the present invention.

Fig 2 represents an example of circuits fo receivers being used in the present invention.

DETAILED DESCRIPTION OF THE INVENTION

Now referring to the accompanying drawings the present invention is described in detail as below.

The present invention relates to electronic devices using earphones and wireless earphones characterized in installing, by plugs 3 or by conventional means, conventional small stereo transmitters T without antennas having circuit as shown in Fig 1 in electronic devices using earphones and in installing small trimmers 1 for variable condensers and coupled resistances 2 for variable resistor in conventional small receivers R of earphones capable of receiving without antennas having circuits as shown in Fig 2.

Upon the above-stated electronic devices using earphones and wireless earphones sound transmitting from the electronic devices can be heared by earphones without wires.

Accordingly although the electronic devices are placed far away from earphones each other indoors or outdoors sound from the electronic devices can be heared by wireless earphones clearly.

CLAIMS

1. Electronic devices using earphones and wireless earphones characterized in installing, by plugs 3 or conventional means, conventional small stereos transmitters T without antennas in electronic devices using earphones and in installing small trimmers 1 for variable condensers and coupled resistances 2 for variable resistor in conventional small receiver R of earphones capable of receiving without antennas.

pages _____, filed with the letter of _____

2. With regard to the language, all the elements marked above were available or furnished to this Authority in the language in which the international application was filed, unless otherwise indicated under this item.

These elements were available or furnished to this Authority in the following language _____ which is:

 the language of a translation furnished for the purposes of international search (under Rule 23.1(b)). the language of publication of the international application (under Rule 48.3(b)). the language of the translation furnished for the purposes of international preliminary examination (under Rule 55.2 and/or 55.3).

3. With regard to any nucleotide and/or amino acid sequence disclosed in the international application, the international preliminary examination was carried out on the basis of the sequence listing:

 contained in the international application in printed form. filed together with the international application in computer readable form. furnished subsequently to this Authority in written form. furnished subsequently to this Authority in computer readable form. The statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the international application as filed has been furnished. The statement that the information recorded in computer readable form is identical to the written sequence listing has been furnished.4. The amendments have resulted in the cancellation of: the description, pages _____. the claims, Nos. _____. the drawings, sheets/fig. _____.5. This report has been established as if (some of) the amendments had not been made, since they have been considered to go beyond the disclosure as filed, as indicated in the Supplemental Box (Rule 70.2(c)).**

* Replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as „originally filed“ and are not annexed to this report since they do not contain amendments (Rules 70.16 and 70.17).

** Any replacement sheet containing such amendments must be referred to under item 1 and annexed to this report.
